

Domain name, Hosting/Server providing.

Consultwise offers services related to domain names and hosting/server provision as part of their IT Services. Here's a brief explanation of what these terms mean:

1. Domain Name: A domain name is the address that people use to access your website on the internet. It's a unique name that identifies a website and typically ends with extensions like .com, .org, .net, etc. For example, "consultwise.us" is the domain name for Consultwise's website.

2. Hosting/Server Providing: Web hosting is a service that allows individuals and organizations to post a website or web page onto the Internet. A web host, or web hosting service provider, is a business that provides the technologies and services needed for the website or webpage to be viewed on the Internet. Websites are hosted, or stored, on special computers called servers.
